

Create your own Corporate Channel with - virtualsign it's childs play!

- Media can be scheduled to run at specific times
- Live TV feeds can be inserted to compliment the channel
- All industry standard media types can be used
- Different zones can display different content
- Multiple channels can be created to suit the ambience and time of day
- Easy to install and maintain
- Supported remotely via modem, satellite or DSL
- Interfaces to existing PA and speaker systems

Virtual Sign is a powerful tool for simply creating corporate TV channel enabling companies to promote corporate identity & brand awareness to their customers by creating a schedule of differing media clips which can include JPEG, GIF, BMP, MPEG 1/2/3/4, QuickTime, Real Player, Flash, TV interrupts, live business feeds, music and film clips, establishments can have their own TV channel which can then be distributed over IP throughout their estate which:-

- Entertains
- Delivers sales and marketing messages
- Displays paid for advertising
- Provides messaging (happy hour, birthday greetings etc.)
- Generates revenue

Below is a sample schedule which includes a wide range of media types including Flash, MPEG2/4, H264, JPEG, TIF, Bitmap etc.

Files are dragged and dropped from their host directory into the schedule making creating a TV channel child's play!!

If the clip is a still and requires music, simply insert a MP3 track to accompany it. Why not create your own content with a digital camera and insert the clips to create your own film/TV channel?

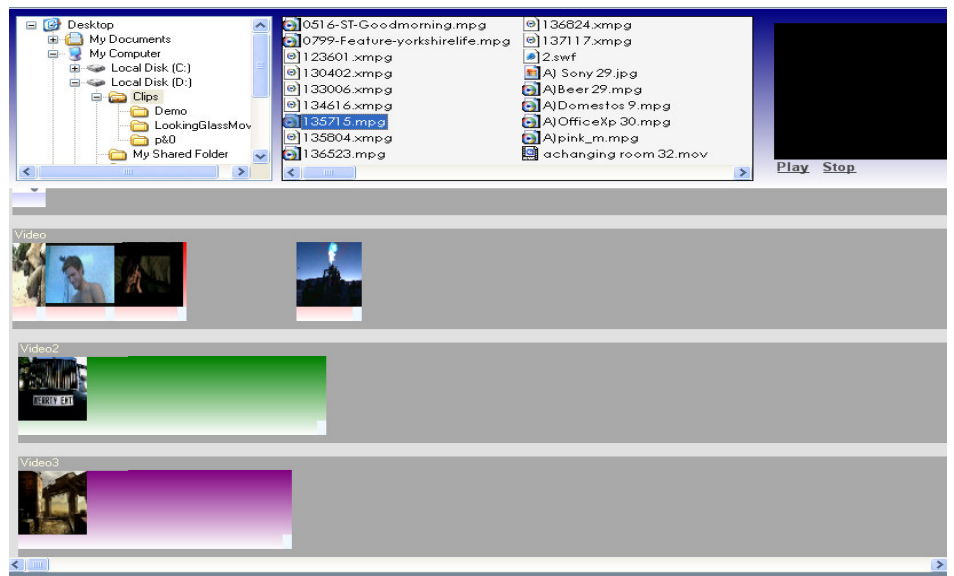

Virtual Sign is very easy to use and presents the user with a simple user interface & enables the user to start creating their own TV channels immediately.
